WANNER™ HYDRA-CELL® PRO PUMPS

INDUSTRIAL CLEANING / Replacing a Plunger Pump for Seal-less Filter Press Cleaning

A processing plant needed a replacement pump for their filter press operation. The current Abel plunger pumps was having frequent maintenance issues and parts were hard to come by. They selected a Hydra-Cell Pro T100 Low Pressure pump to replace their current pump due to the seal-less nature of the

Hydra-Cell and the pump's ability to handle abrasive fluids. They are extremely pleased with the pump and plan on using the pump at future expansion plants.

Wanner Hydra-Cell Pro was selected for the following reasons:

- Seal-less design with no packing to wear or replace
- Ability to handle particulates and abrasives
- Reduced maintenance compared to obsolete pump

Pump: [Hydra-Cell Pro T100](#)

Media: Water with particulates

Flow: 96 gpm (363 lpm)

Pressure: 1500 psi (103 bar)
